

FEATURES

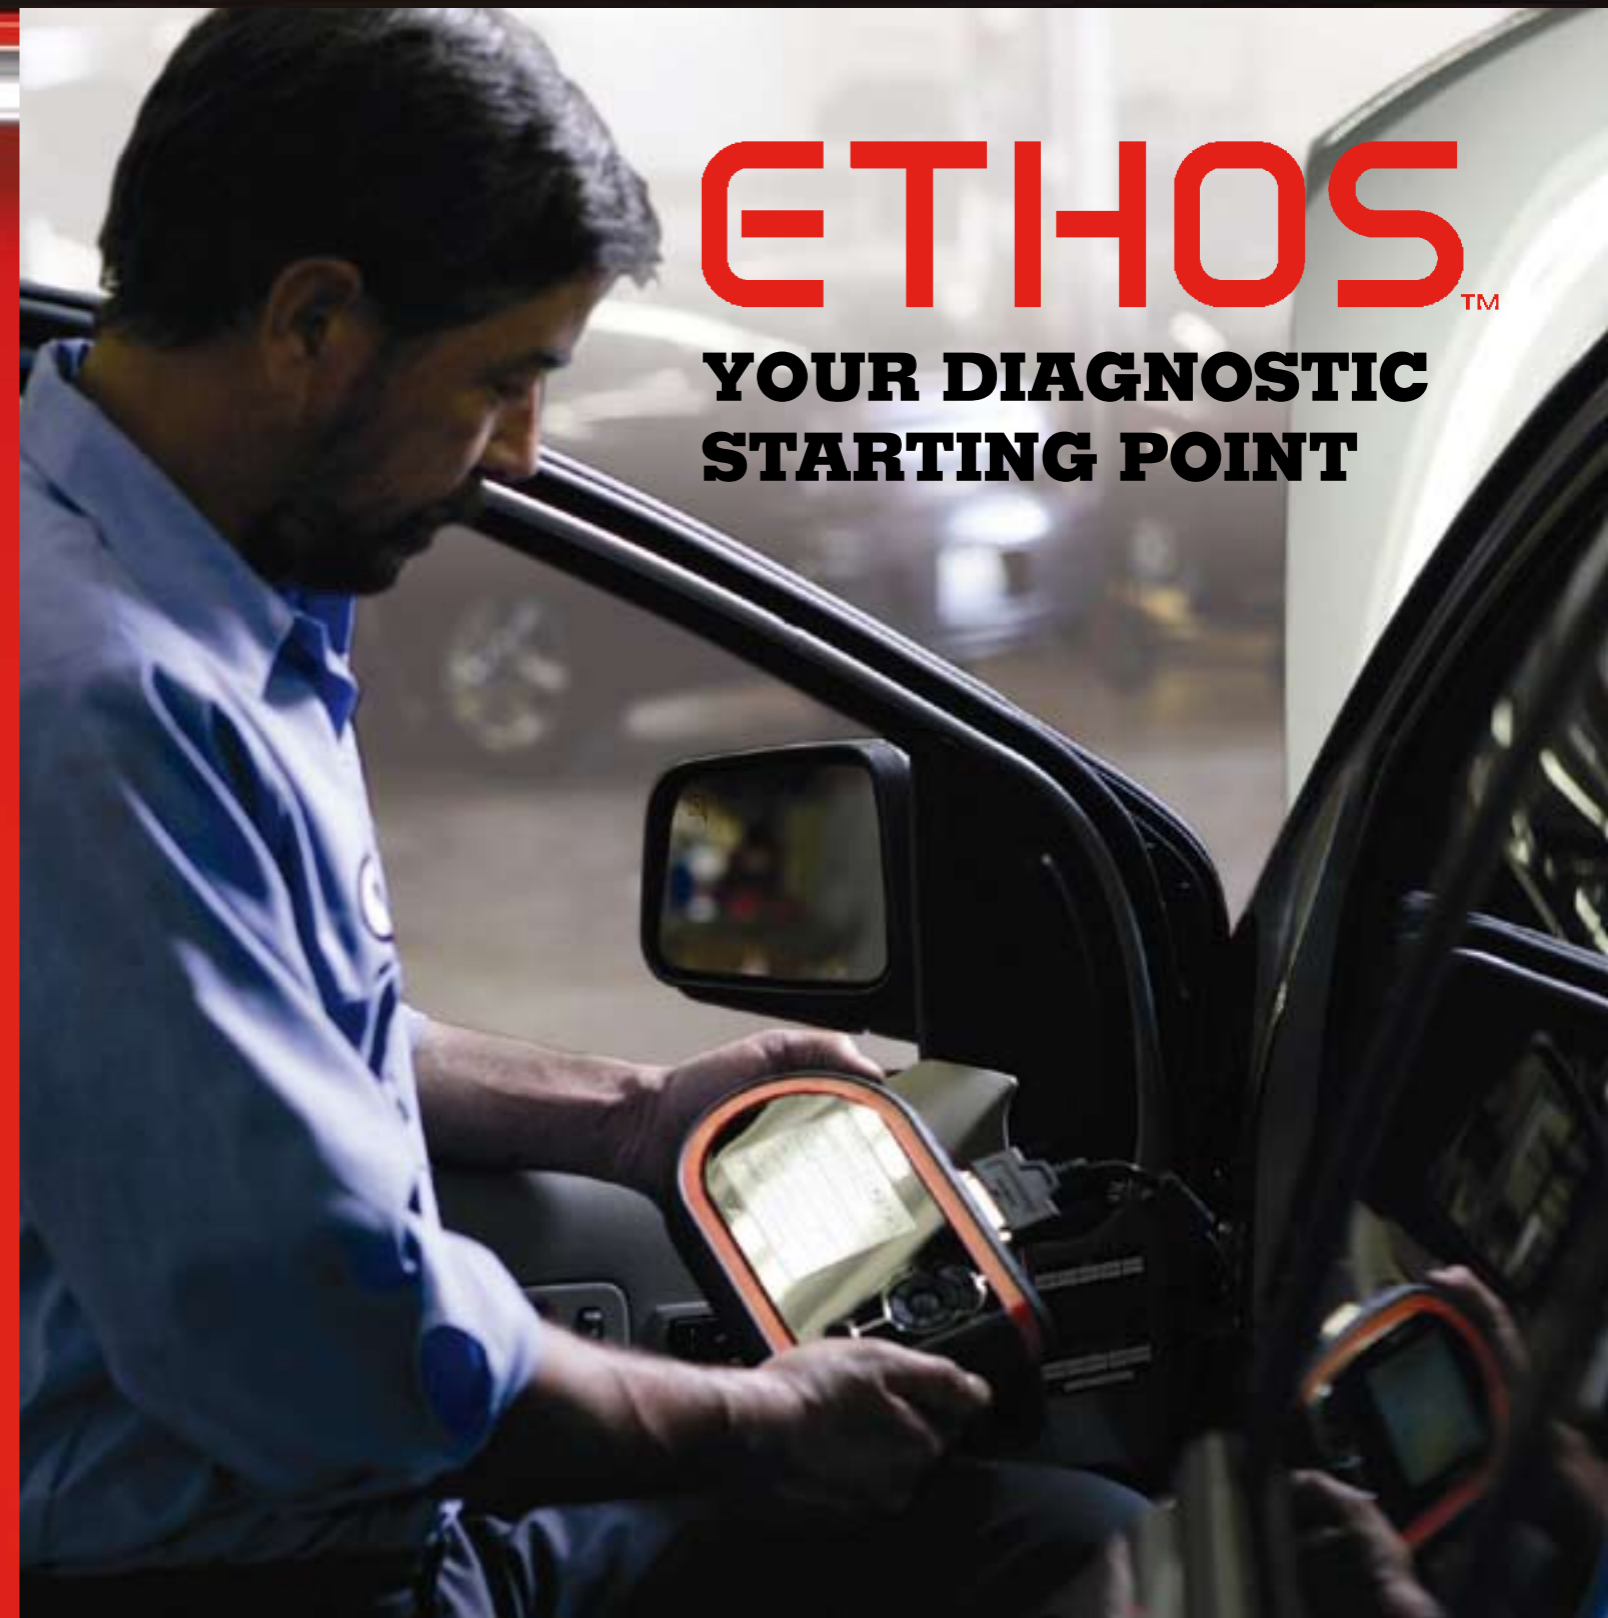

MODIS™ SOLUS™ ETHOS™

Lab Scope - samples at 6 million times per second	•		
1, 2, 3 or 4 trace scope mode	•		
CTM (Component Test Meter)	•		
Preset component test routines	•		
Dual Graphing Multimeter	•		
Digital volt ohm meter	•		
Standard ignition scope	•		
D.I.S (Distributorless ignition system) ignition scope	•		
C.O.P (Coil on plug) ignition scope	•		
Rechargeable battery and charger	•		
VGA output for remote display or projection interface	•		
USB port expandability	•		
Serial port expandability	•		
Wireless communications capabilities	•		
Full size VGA LCD screen	•		
Windows CE operating system	•	•	
Fast ARM processor	•	•	
2000 frames of data movie mode of graphing data	•	•	
Activate cursors for pinpoint accuracy	•	•	
User defined PID triggering for intermittent fault capture and diagnosis	•	•	
Freeze frame feature of graphing data	•	•	
Customised data list graphed on screen	•	•	
2000 frames of data movie mode of graphing data	•	•	
Colour display	•	•	
Graphing data mode	8	4	4
Print capability	USB/IR	IR	USB
User programmable S function key to save, freeze and print screen data	•	•	•
Compact Flash software storage and upgrades	•	•	•
4 Way navigation thumb pad	•	•	•
Pause data for review	•	•	•
On Screen instructions	•	•	•
Familiar navigation and controls	•	•	•
EOBD vehicle communications capability	•	•	•
Record data stream values while road testing	•	•	•
Perform functional tests	•	•	•
Live data and trouble codes displayed	•	•	•
Detailed trouble code definitions on screen	•	•	•
Read and clear trouble codes	•	•	•
Robust design for workshop use	•	•	•
Built in CAN protocol support	•	•	•

PUT THE POWER OF ETHOS™ TO WORK FOR YOU

ETHOS™ provides you with a versatile scan tool that will increase your productivity. See how quickly ETHOS™ delivers the information you need to diagnose and repair today's complex vehicles. ETHOS™ and Sun will give you the diagnostic power you need to get the job done. Ask your Sun distributor for an ETHOS™ demonstration today.

INTRODUCING THE LATEST INNOVATIVE AND AFFORDABLE SCANNER FROM SUN

Modern technicians know you need powerful diagnostic tools to work on today's cars, but too many entry level handhelds don't offer the advanced functions and upgrade capabilities you need to make your investment worthwhile.

That's all changed, because now there's ETHOS™, the affordable entry level scanner from Sun.

ETHOS™ not only offers total EOBD vehicle coverage, but also has the capacity to support Sun's extensive manufacturerspecific software, that covers thousands of different and unique vehicle configurations. All this, plus ETHOS™ has built in CAN system capabilities to deal with today's sophisticated vehicles.

• **FAST VEHICLE IDENTIFICATION AND RECALL**

One of the great features of ETHOS™ is the ability to save and recall the ID details of the last 20 vehicles scanned. Fast recall means quicker confirmation that the diagnostic job has been correctly repaired and the vehicle is ready to be returned to the customer.

• **RECORD, SAVE AND REVIEW DATA AS A MOVIE**

ETHOS™ has the power to record up to 230 frames of data that you can save and review frame by frame in either PID or graphing format, helping you accurately pinpoint and diagnose faster.

4.7" Monochrome display, with replaceable faceplate
User programmable S key

Compact flash memory slot
Easy 4 way navigational controls
Graphs 4 parameters at once
Power button

Mini USB port for PC connection
USB port for printing
25 pin connector for vehicle communication
AC power input
